

Amidoamine (Stearamidopropyl Dimethylamine).

What is it?

Amidoamine is a byproduct in the production of the sudsing agent (surfactant) cocamidopropyl betaine (CAPB). Amidoamine may be present in any product that contains CAPB.

It is important to note that you may not see amidoamine listed in the ingredients. You may still see cocamidopropyl betaine, or betaine. CAPB is in many shampoos, bath gels, bar soaps, and liquid soaps.

AMIDOAMINE can also be known as:

- Stearamidopropyl dimethylamine
- Octadecanoylamidopropyldimethylamine
- Dimethylaminopropyl stearamide
- Stearic acid 3-dimethyl aminopropylamide

Some Possible Uses of AMIDOAMINE / CAPB /

Where it might be found:

- Baby wipes, Body wipes, Face wipes
- Bar soap, body wash, body scrub
- Shower or bath gel, Bubble bath
- Body creams and lotions
- Shampoo, Dandruff shampoo
- Hair conditioner
- Hair mousse, gel, foam, detangler
- Hair bleach, Hair color
- Facial cleanser, wash

- Face creams and lotions, toner
- Anti-aging products, Eye creams
- Makeup: bronzer/highlighter, concealer, powder, foundation, lip balm, lipstick, eyeliner, brow gel/styler
- Shave gel, shaving cream, after shave

- Hand cleanser, Liquid hand soap
- Mouthwash, Toothpaste
- Contact lens cleaner, solution
- Acne wash, cleanser, scrub, treatment
- Anal hygiene product, hemorrhoid wipes
- Antiseptic, wound care products
- Feminine hygiene products
- Household cleaners
- Dish soap
- Laundry detergent
- Pet care items

Other products that might react like

AMIDOAMINE:

- Cocamidopropyl betaine (CAPB)
- Dimethylaminopropyl amine (DMAPA)
- Oleamidopropyl dimethylamine
- Betaines

What should I do to avoid AMIDOAMINE?

You should avoid this ingredient by avoiding any product that contains amidoamine or CAPB.

Check the complete ingredient list of each product you use for amidoamine or CAPB. For products already at home that do not list ingredients, go to the store and inspect the original box or package.

Some products' ingredient lists are available on the internet at the manufacturer's or store's website.

To find a workplace exposure, check with your safety officer to find items that may have amidoamine.

Amidoamine (Stearamidopropyl Dimethylamine).

Ask your hairdresser, barber and medical provider to avoid using amidoamine and CAPB in your care. If you must come in contact with amidoamine or CAPB as you care for others, wear rubber or vinyl gloves.

In addition, the ACDS Contact Allergen Management Program® (CAMP®) can help manage contact dermatitis. It helps to find products that are safe to use by creating a list of products that do not contain one's allergens. For more information about CAMP®, please ask your doctor or visit www.contactderm.org.
