

Cocamide DEA

What is it?

Cocamide diethanolamine (DEA) is a coconut-derived sudsing ingredient. It is often used as a cleanser, foaming agent, thickener, or stabilizer in shampoos and soaps.

COCAMIDE DEA can also be known as:

- Coconut oil diethanolamine
- Coconut diethanolamide
- Acyl derivatives
- Cocoyl diethanolamide

Some Possible Uses of COCAMIDE DEA / Where it might be found:

- Anti-fungal creams
- Foaming anti-septic solution
- Shampoo including dandruff shampoo
- Bath soap
- Shower gel / Body wash
- Bubble bath
- Bath finger paint or foam
- Bath salts
- Liquid hand soap
- Antibacterial cleanser
- Exfoliant scrub
- Shaving gel, cream
- Facial cleanser
- Hair color
- Hair relaxer
- Dishwashing detergent
- Kitchen or office sanitizer
- Laundry detergent
- Car wash
- Cleanser, degreaser
- Pesticide
- Pet shampoo
- Industrial cleaner
- Cooling fluid
- Hydraulic lubricating oil
- Lubricant in plastics manufacture

Other products that might react like

COCAMIDE DEA:

- PEG - 3 Cocamide DEA

Cocamide DEA is different from cocamide MEA, which also comes from coconut. Cocamide DEA and cocamide MEA usually do not show cross sensitivity.

What should I do to avoid COCAMIDE DEA?

Avoid using any product that contains cocamide DEA.

It is important to check the label of each product you use to find the complete ingredient list. If cocamide DEA is present, one of its names listed above should appear in the ingredients. If no ingredient list is present, go to the store and inspect the original box or package. Some products' ingredient lists are available on the internet at the manufacturer's or store's website.

To find a possible workplace exposure, check the complete ingredient list of every item you encounter.

If you must come in contact with cocamide DEA at work or as you care for others, wear gloves made of rubber, nitrile, or vinyl.

Ask your hairdresser, barber, masseuse, nurse, and others to avoid using products containing this allergen in your care.

In addition, the ACDS Contact Allergen Management Program® (CAMP®) can help manage contact dermatitis. It helps to find products that are safe to use by creating a list of products that do not contain one's allergens. For more information about CAMP®, please ask your doctor or visit www.contactderm.org.
