

Compositae Mix

What is it?

Compositae is a large family of plants* with over 20,000+ species of flowers, herbs, vegetables, and weeds. Botanical extracts from some of these plants are often added to products for skin and hair.

COMPOSITAE MIX can also be known as:

Asteraceae. This family contains sesquiterpene lactones. These are found throughout the plant in the leaves, stems, and flowers.

Some Possible Uses of COMPOSITAE MIX /

Where it might be found:

- Pain relief wound cream
- Tea infusion compress
- Pet shampoo

Other products that might react like COMPOSITAE MIX:

- Sesquiterpene lactone mix
- Balsam of Peru
- Fragrances
- Plant extracts

What should I do to avoid COMPOSITAE MIX?

Avoid using any product that contains extracts of *Compositae* plants.

Check the label of each product you use for the complete ingredient list. If no ingredient list is present, go to the store and inspect the original box or package. Some products' ingredient lists are available on the internet at the manufacturer's or store's website.

To find a possible workplace exposure, check the ingredient list of each product you encounter.

Ask your partner, physical therapist, masseuse, hairdresser, and others to avoid using products containing these plants in your care.

It can be very difficult to avoid contact with all species of this family. Try to remove those that are in your house, yard, and garden. Use gloves for gardening and handling listed vegetables. Applying Ivy Block may give some protection. Avoid prolonged outdoor activity when these plants are in bloom. Close windows against their pollen. Airborne contact dermatitis may mimic a sun induced rash.

Sometimes eating these plants or taking herbal supplements or teas made from them may worsen a rash.

If you use the CAMP app, your provider will designate whether you need to avoid *Compositae* and fragrance or just *Compositae*.

In addition, the ACDS Contact Allergen Management Program® (CAMP®) can help manage contact dermatitis. It helps to find products that are safe to use by creating a list of products that do not contain one's allergens. For more information about CAMP®, please ask your doctor or visit www.contactderm.org.
