

Decyl Glucoside

What is it?

Decyl glucoside is a surfactant used in many skin and hair products. It is widely used in “natural” products because it is derived from plants, is biodegradable, and considered gentle.

DECYL GLUCOSIDE can also be known as:

- Alkyl (c8, c10) polyglycoside
- APG0810
- (C8-10) Alkyl ether of corn sugar
- C16H32O6
- D-Glucopyranoside, decyl
- D-Glucopyranose, oligomeric, decyl octyl glycosides
- D-glucose, decyl octyl ethers, oligomeric
- Decyl D-glucopyranoside
- Decyl D-glucoside
- Decyl octyl d-glucose
- Glucoside, decyl

Other products that might react like DECYL GLUCOSIDE:

- Coco glucoside
- Lauryl glucoside
- Cetearyl glucoside

What should I do to avoid DECYL GLUCOSIDE?

Avoid using any product that contains decyl glucoside and other glucosides. It is important to check the label of each product you use to find the complete ingredient list.

If no ingredient list is present, go to the store and inspect the original box or package. Some products' ingredient lists are available on the internet at the manufacturer's or store's website.

Ask your hairdresser or hair stylist to avoid using products that contain decyl glucoside in your care.

In addition, the ACDS Contact Allergen Management Program® (CAMP®) can help manage contact dermatitis. It helps to find products that are safe to use by creating a list of products that do not contain one's allergens. For more information about CAMP®, please ask your doctor or visit www.contactderm.org.
