

Dialkyl Thioureas

What is it?

The dialkyl thioureas are:

- Diethylthiourea
- Dibutylthiourea

These are rubber accelerators. A rubber accelerator is a chemical used when making rubber. It speeds up the liquid to solid rubber transformation. It can become a part of the final product in this process. It is also part of neoprene production.

Thioureas are also found in copy paper. This may cause photoallergic contact dermatitis. They may be in many other products as well.

Note that this is different from a latex allergy.

DIALKYL THIOUREAS can also be known as:

- 1,3-Dibutyl-2-thiourea
- Diethylthiourea
- N,N-diethylthiocarbamide
- 1,3-Dibutylthiourea
- Diethyl-2-thiourea
- N,N-diethyl-thiourea
- DBTU
- EBTU
- Pennzone e
- DMTU
- ETU
- Thiocarbamide
- DPTU
- N,N-Dibutylthiourea
- Thiourea
- DTU
- N,N-Di-nbutylthiourea
- Thiate h

Some Possible Uses of DIALKYL THIOUREAS

/ Where it might be found:

- Neoprene (a.k.a polychloroprene) and spandex products
- Wet suits and slimming suits
- Rubber weather strips
- Knee and elbow sleeves
- Swim goggles
- Waders for fishing
- Exercise bands
- Insoles of shoes or athletic shoes
- Keyboard wrist supports
- Copy paper
- Diazo paper
- Metal pickling
- Fungicides
- Glues
- PVC (polyvinyl chloride) adhesive
- Insecticides, pesticides, fungicides
- See the rubber accelerator sheet for more sources
- Orthopedic braces, prostheses, splints and foot supports
- Rubber masks
- Sleep apnea mask
- Gloves
- Rubber-based materials in automobiles
- Photography fixative
- Commercial paint and glue remover
- Acidic detergent
- Silver polish dip
- Disinfectants
- Phonecard thermos coating
- Metal anti-corrosion agents
- Stain remover

Dialkyl Thioureas

Other products that might react like DIALKYL THIOUREAS:

- None

What should I do to avoid DIALKYL THIOUREAS?

Avoid ALL rubber. Use fabric, leather, or plastic to handle dry rubber. Wear heavy duty vinyl gloves to protect against workplace contact. For non-rubber items, check the Material Safety Data Sheet.

What products may NOT have dialkyl thioureas?

- Showa N-Dex Accelerator-Free nitrile gloves
- Vinyl, plastic, silicone, polyurethane, polyethylene, neoprene or acrylic gloves
- Honeywell Safety Silvershield/4H chemically resistant gloves
- Examination gloves: Showa N-Dex Accelerator-free nitrile gloves, Ansell Micro-Touch NitraFree, SmartPractice Reflection Sky Sensitive Nitrile
- Surgical gloves: Ansell GAMMEX Non-Latex Neoprene Surgical glove, Medline DermAssure Neoprene Surgical glove, Mölnlycke Health Biogel NeoDerm Surgical glove

In addition, the ACDS Contact Allergen Management Program® (CAMP®) can help manage contact dermatitis. It helps to find products that are safe to use by creating a list of products that do not contain one's allergens. For more information about CAMP®, please ask your doctor or visit www.contactderm.org.
