Other products that might react like IODOPROPYNYL BUTYLCARBAMATE:

None

What should I do to avoid IODOPROPYNYL BUTYLCARBAMATE?

To avoid IPBC, check the complete ingredient list of each product you use. For products already at home that do not list ingredients, go to the store and inspect the original box or package.

Some product ingredient lists are available on the internet at the manufacturer's or store's website.

To find a possible workplace exposure, check the complete ingredient list of all items encountered. It may be necessary to contact the manufacturer.

Ask your hairdresser, barber, physician, nurse, and others to avoid using products with IPBC in your care. If you must come in contact with IPBC in your work or as you care for others, wear gloves made of rubber, nitrile, or vinyl.

In addition, the ACDS Contact Allergen Management Program® (CAMP®) can help manage contact dermatitis. It helps to find products that are safe to use by creating a list of products that do not contain one's allergens. For more information about CAMP®, please ask your doctor or visit www.contactderm.org.
