How to avoid it:

Avoid using any product that contains **jasmine**. Check the label of each product you use to find the *complete* ingredient list. Jasmine may be included under one of the names above or as part of added **fragrance, essential oil, or *parfum***. If no ingredient list is present, go to the store and inspect the original box or package. Some products' ingredient lists are available on the internet at the manufacturer's website, the store's website, or websites such as <http://householdproducts.nlm.nih.gov>, <http://www.cosmeticsdatabase.com>, or <http://www.drugstore.com>.

For possible workplace exposure, check the complete ingredient list of each product you encounter, looking for one of the names highlighted above.

If you must come in contact with jasmine at work or as you care for children, elders, or pets, wear protective gloves made of rubber, nitrile, or vinyl.

Ask your hairdresser, barber, esthetician, masseuse, attendant, nurse, and others involved in your care to avoid using products that contain this allergen on your skin or hair.

By reading ingredient labels, you should be able to avoid this allergen and find safe alternative products that do not contain it.

Cross-sensitivity may occur to benzyl salicylate, geraniol, linalool, amyl cinnamic aldehyde and benzylidene acetone.
