

Limonene

What is it?

Limonene is a substance with a strong citrus scent. It comes from citrus rind, essential oils of citrus, or can be made synthetically. Limonene is in perfumes, soaps, and cleansing products. It is one of the main allergens in many essential oils.

At room temperature, it transforms to hydroperoxides of limonene which is even more allergenic.

Fragrances give an aroma to a product. They are often mixtures which create a unique scent. Products with the terms *natural*, *unscented*, *hypoallergenic*, and *fragrance free* are not regulated and thus may contain fragrance. Do not trust these labels. However, know that true *fragrance-free* products do exist.

LIMONENE can also be known as:

- D-Limonene
- Dipentene
- Hydroperoxides of Limonene
- Carvene
- (+)-4-Isopropenyl-1- Methylcyclohexene
- Optical Isomer of Dipentene
- (+)-R-Limonene
- ®-1-Methyl-4-(1-Methylethenyl) Cyclohexene D-(+)-Limonene

Some Possible Uses of LIMONENE / Where it might be found:

- Liquid and bar soap, cleansers
- Cream, lotion, oil
- Make-up, make-up remover, toner
- Shaving cream, gel, hair removal cream, after shave

- Perfume, cologne, body mist
- Deodorant, antiperspirant

Limonene

Other products that might react like

LIMONENE:

- Other fragrances
- Propolis
- Colophony
- Hydroperoxides of limonene

What should I do to avoid LIMONENE?

It is best to avoid all fragrance. Even if marketed as *unscented* or *fragrance-free*, these products can contain fragrance. Look for fragrance, plant, or botanical names on labels. For products at home with no ingredients, go to the store to inspect the original package or look at the manufacturer's or store's website.

You may have to avoid airborne fragrance. For example, candles and incense. Exposure may also occur from contact with partners that use fragrance.

To identify workplace exposure, check ingredient lists. Sometimes fragrance is present even though not listed. You may need to contact the manufacturer. Material Safety Data Sheets (MSDS) sheets usually do not include the full ingredient list. Substitute fragrance-free alternatives or wear rubber or vinyl gloves.

In addition, the ACDS Contact Allergen Management Program® (CAMP®) can help manage contact dermatitis. It helps to find products that are safe to use by creating a list of products that do not contain one's allergens. For more information about CAMP®, please ask your doctor or visit www.contactderm.org.
