

Methylchloroisothiazolinone & Methylisothiazolinone

What is it?

Methylchloroisothiazolinone and methylisothiazolinone (MCI/MI) are used alone (MI) or together (MCI/MI) as preservatives. They are active against bacteria, yeast, fungi, and algae. They are in many personal, household, and industrial products.

METHYLCHLOROISOTHIAZOLINONE and METHYLISOTHIAZOLINONE can also be known as:

- Methylchloroisothiazolinone / Methylisothiazolinone
- Methylisothiazolinone
- 5-chloro-2-methyl-4-isothiazolin-3-one
- Cl Me-Isothiazolinone
- Cl+Me-Isothiazolinone
- Me-Cl-Isothiazolinone
- Methyl-4-isothiazolin-3-one
- 2-methyl-4-isothiazolin-3-one
- Kathon CG
- Euxyl K100
- MCI/MI

Some Possible Uses of MCI/MI /

Where it might be found:

Personal Care

- Shampoo, hair conditioner, detangler
- Hair styling mousse, foam, and gel
- Moisturizer, cream, lotion
- Body wash and soap
- Mouthwash
- Hand cleanser
- Facial cleanser, scrub, mask
- Make up remover
- Moist towelettes, wet wipes
- Baby wipes, baby shampoo

- Children's nail polish
- Hair color
- Facial moisturizer, anti-aging products
- Sunscreen, sunless tanner
- Foot scrub
- Bubble bath
- Shaving cream

Household

- Laundry detergent
- Fabric softener, stain remover
- Household shampoo, cleaners
- Pre-moistened mop, sponge
- Glues (i.e. school glue/craft glue)
- Wax, polish
- Paint, enamel, primer, sealer
- Dish soap
- Fruit & veggie wash
- Home-made slime for children

Other

- Latex emulsion
- Residential wall paint
- Fountain/cooling tower water
- Biocide
- Bubble blowing solution
- Dehumidifier solution
- Adhesive, glue
- Binding agent
- Cutting fluid, metal working
- Milk sampling product
- Flax spinning
- Jet fuel, anti-static
- Pesticide, weed killer
- Pet spray, pet shampoo, pet wipes
- Printing ink
- Coloring agent
- Paper mill

Methylchloroisothiazolinone & Methylisothiazolinone

- Anti-slime agent
- Over-ear wireless headphones

Other products that may cross-react with METHYLCHLOROISOTHIAZOLINONE and METHYLISOTHIAZOLINONE:

- Benzisothiazolinone
- Octylisothiazolinone

What should I do to avoid METHYLCHLOROISOTHIAZOLINONE and METHYLISOTHIAZOLINONE?

To avoid MCI/MI, check the complete ingredient list of each product you use. For products already at home with no ingredient list, go to the store and inspect the original box or package. Some products' ingredient lists are available on the internet at the manufacturer's or store's website.

Some prescriptions like halobetasol and crotamiton contain MCI/MI.

You may be exposed to MCI/MI by coming in contact with items your partner is using. Ask your hairdresser, aesthetician, and others to avoid using MCI/MI in your care. Tell your provider.

Rarely, MCI/MI present in paint in recently painted rooms causes airborne (through the air) rashes. This might show on your skin as rashes on your face, neck, and other exposed areas.

Rarely, methylisothiazolinone causes worsening of rashes with sun exposure. This is called photo-aggravated allergic contact dermatitis.

To find a possible workplace exposure, check the complete ingredient list of all items you encounter. You may need to contact the manufacturer.

If you must come in contact with MCI/MI in your work or as you care for others, wear gloves made of rubber, nitrile, or vinyl.

In addition, the ACDS Contact Allergen Management Program® (CAMP®) can help manage contact dermatitis. It helps to find products that are safe to use by creating a list of products that do not contain one's allergens. For more information about CAMP®, please ask your doctor or visit www.contactderm.org.
