

Neomycin

What is it?

Neomycin is an antibiotic. It is in many creams, ointments, powders, eye and ear medicines, bandages, and veterinary products.

NEOMYCIN can also be known as:

- Neomycin sulfate

Some Possible Uses of NEOMYCIN / Where it might be found:

- Antibiotic cream, ointment, salve
- Bandages or gauze
- Pain relief preparation
- Wound care ointment
- First aid cream
- Scar treatment
- Ulcer preparation
- Ear drops (i.e. swimmer's ear drops)
- Eye drops, ointment, solution
- Nose drops
- Medicated powder
- Dentist root canal filling
- Urinary irrigant
- Pet ointment (Animax)
- Veterinary animal feed, pet food
- Preservative in some vaccines

Neomycin may be combined with polymyxin B and bacitracin. This is marketed as:

- Neosporin
- Triple antibiotic

Other brands that have neomycin include:

- Cortisporin
- Maxitrol
- Neocidin
- Neo-Synalar
- Otcort

Other products that might react like

NEOMYCIN:

Your allergy to neomycin means you could react to certain closely related antibiotics. You could develop a rash all over your body if you are given one of these by mouth or injection. Do NOT use it without talking with your healthcare provider.

- Tobramycin
- Gentamicin
- Butirosin
- Paromomycin
- Framycetin
- Kanamycin
- Amikacin
- Streptomycin
- Dihydrostreptomycin
- Netilmicin
- Sisomicin
- Ribostamycin

What should I do to avoid NEOMYCIN?

Avoid any product that lists neomycin as an ingredient. Inspect the label, box, or package insert to find the complete list of ingredients for everything you use on your skin, eyes, or ears.

Neomycin is in many over the counter preparations at your drug store and grocery store. It may also be found in prescriptions.

You must tell your doctors, dentist, nurse, and any caretakers about this allergy.

OTHER:

What can you use?

Some people who are allergic to neomycin are also allergic to bacitracin and polymyxin B. If you

Neomycin

were tested to bacitracin and polymyxin B and are not allergic to them, you can use:

- Plain bacitracin ointment
- Polysporin (bacitracin + polymyxin B)

Your medical provider can prescribe a different treatment that is safe for you to use. Some safe choices may include:

- Mupirocin (Bactroban)
- Erythromycin
- Silver sulfadiazine (Silvadene)

Topical sulfonamides, fluoroquinolones, chloramphenicol, and tetracyclines may also be considered.

You may also be instructed on how to use:

- Povidone - iodine
- Chlorhexidine
- Hydrogen peroxide
- Compresses with aluminum acetate

In addition, the ACDS Contact Allergen Management Program® (CAMP®) can help manage contact dermatitis. It helps to find products that are safe to use by creating a list of products that do not contain one's allergens. For more information about CAMP®, please ask your doctor or visit www.contactderm.org.
