

PARATERTIARY BUTYLPHENOL FORMALDEHYDE RESIN

_____Name

_____Date

also called... **p-tert-butylphenol formaldehyde resin, 4-(1,1-dimethylethyl) phenol, butylphen, PTBP formaldehyde, or 4-tert-butylphenolformaldehyde resin.**

What is it?

Paratertertiary butylphenol formaldehyde resin (PTBFR) is a phenol-formaldehyde resin used mainly in adhesives, especially to glue leather and rubber.

Where might it be found?

Shoes, shoe repair glue
Sponge rubber athletic insoles
Laminated leather articles
Wallets, handbags, purses
Belts, hats
Watchbands
Hockey pads
Fabric glue, fabric labels
Furniture and upholstery glue
Automobile upholstery glue
Wood glue for construction
Hobby and do-it-yourself glues
Waterproof glues
Rubber handled tools
Neoprene cement
Wetsuits
Box adhesive
Hearing aids
Athletic tape, Micropore^R tape
Diaper tapes
Dental bonding material
Electrode adhesive
Bindi
Lip liner

Fiberglass production

Glossy fabrics

High quality paper

Insecticides

Latex glue additive for initial resin adhesive force

Masonry sealant

Motor oil additives

Paint, varnish, lacquer resin

Plastic nail adhesive

Plastic prostheses

Plasticizer for cellulose acetate

Plywood, hardboard, laminated wood

Printing inks, marking pens

Rubber antioxidant intermediate

Stabilizer in cellulose ester plastics

How to avoid it:

Do not use products that contain PTBFR. At work check the complete ingredient list of all items you encounter, looking for the names listed above. If you cannot avoid contact, wear heavy-duty chemical resistant gloves for protection. Fabric or leather gloves protect from dry items.

Avoid getting your shoes wet. Moisture releases the chemical onto your skin. Always wear socks inside your shoes. Change socks often to keep sweat from dampening shoes. Remove PTBFR insoles, scrape out all old adhesive, and glue in a new insole with *Elmer's Glue-All*. Use *metal* watchbands and *plastic* or *vinyl* purses. Wear shoes made of *vinyl, polyurethane, silicone, canvas, or plastic*. Canvas Keds, Nike shoes, and all Birkenstocks are PTBFR-free. *Scanpor* tape, *cyanoacrylate* glues, and *Loctite Permatex* and *Sta-Lok* sealants are safe to use.

Also might be found in:

Aircraft sealant
Antioxidant in soap
Automotive sealant
Brake linings
Color film developer
Commercial deodorizers
De-emulsifier in oil field drilling
Disinfectant detergents
Duplicating paper
Electrical insulation
