A common surgical scrub that has chloroxylenol is BD E-Z Scrub 3% PCMX.

Other products that might react like 4-CHLORO-3,5-XYLENOL (PCMX):

You may also react to chlorocresol, also known as 4-chloro-3-cresol, parachloro-m-cresol, or PCMC. Your CAMP app is not programmed to automatically exclude PCMC. Ask your provider if PCMC should be added to your allergy list in CAMP.

What should I do to avoid 4-CHLORO-3,5-XYLENOL (PCMX)?

Check the ingredients of all items that you use. Avoid using any product that contains chloroxylenol. Also avoid any of the names mentioned above. If no ingredient list is present, inspect the original box or package. Or, look at the manufacturer's or store's website.

4-chloro-3,5-xlenol.(PCMX).

To find a workplace exposure, check the ingredients of all items that you use. Your work safety officer may help identify products that contain it. Sometimes it is necessary to contact the manufacturer of a product to learn if this agent is present in it.

Of note, latex, vinyl, and polyethylene gloves will protect you from PCMX for only about 60 minutes.

Alternative cleansers that should be safe:

- Ethyl alcohol-based (e.g. Purell Hand Sanitizer, Germ-X Hand Sanitizer)
- Chlorhexidine scrub (e.g. Hibiclens, Betasept)
- Povidone-iodine surgical scrubs (e.g. Betadine)
- Check your CAMP app for other liquid soap and bar soap options

In addition, the ACDS Contact Allergen Management Program® (CAMP®) can help manage contact dermatitis. It helps to find products that are safe to use by creating a list of products that do not contain one's allergens. For more information about CAMP®, please ask your doctor or visit www.contactderm.org.
