Phenoxyethanol

ingredients, go to the store and inspect the original box or package.

Some products' ingredient lists are available on the internet at the manufacturer's or store's website.

Ask your hairdresser, aesthetician, masseuse, ultrasound technician and medical providers to avoid using products containing phenoxyethanol in your care. Your exposure to phenoxyethanol could come through contact with a partner who uses products containing it.

To find a possible workplace exposure, check the complete ingredient list of each solution and product you encounter. Wear rubber, nitrile, or vinyl gloves if you cannot avoid touching this substance.

In addition, the ACDS Contact Allergen Management Program® (CAMP®) can help manage contact dermatitis. It helps to find products that are safe to use by creating a list of products that do not contain one's allergens. For more information about CAMP®, please ask your doctor or visit www.contactderm.org.
