- Polysorbate
- Sorbitol
- Sorbic acid

What should I do to avoid SORBITAN SESQUIOLEATE?

To avoid this allergen, check the complete ingredient list of each product you use for the names listed above. For items already at home that do not list ingredients, go to the store and inspect the original box or package. Some products' ingredient lists are available on the internet at the manufacturer's or store's website.

Ask your medical provider to avoid using items with this allergen and its related compounds in your care.

Sorbitan Sesquioleate

This allergen and the closely related sorbitol derivatives are also used in agrochemicals, inks, paints, and metalworking.

To find a possible workplace exposure, check the complete ingredient list of each product encountered for one of the names above.

If you must come in contact with sorbitol related compounds in your work or when caring for others, wear rubber, nitrile, or vinyl gloves.

OTHER:

Sorbitan sesquioleate is used as the emulsifier in some patch test substances, such as:

- Balsam of Peru
- Fragrance mix I
- Ethylene urea/melamine formaldehyde resin
- Compositae mix
- Glutaraldehyde

In addition, the ACDS Contact Allergen Management Program® (CAMP®) can help manage contact dermatitis. It helps to find products that are safe to use by creating a list of products that do not contain one's allergens. For more information about CAMP®, please ask your doctor or visit www.contactderm.org.
