- Vitamin E

What should I do to avoid TOCOPHEROL (VITAMIN E)?

Read the complete ingredient list on the label of every product you use, looking for Vitamin E or one of its other names highlighted above. If no

Tocopherol (Vitamin E)

ingredient list is present, go to the store and inspect the original box or package. Some products' ingredient lists are available on the internet at the manufacturer's or store's website.

To find a possible workplace exposure, check the complete ingredient list of each product you encounter there, looking for one of its names.

By reading ingredient labels, you should be able to avoid this allergen and find safe alternatives that are free of it.

Ask your hairdresser, aesthetician, and medical providers to avoid using products containing tocopherol in your care. Your exposure to tocopherol could come through contact with a partner who uses products containing it.

Do not empty Vitamin E Capsules onto your skin!

In addition, the ACDS Contact Allergen Management Program® (CAMP®) can help manage contact dermatitis. It helps to find products that are safe to use by creating a list of products that do not contain one's allergens. For more information about CAMP®, please ask your doctor or visit www.contactderm.org.
